Born out of humble beginning in 2002, BMT started its business as die cast mold manufacturer in order to fulfill market demand. We understand the importance of a good mold in order to produce smooth and reliable die casting production. That's why we always maintain inhouse tooling design know-how and manufacturing at the very core of our business.

Our manufacturing policy is creating efficient, compact while still being practical in order to maintain competitiveness and still producing the highest quality die casting products. Maintaining TRUST from our customer is our utmost priority therefore we always work tirelessly to improve and listen to customers needs.
